

ESGI 149 - INNSBRUCK, MARCH, 04-08, 2019

EUROPEAN STUDY GROUP WITH INDUSTRY

The European Study Groups with Industry (ESGI) bring together industrialists, students, postdocs, young academic researchers to work for a week in mathematical modeling and enhance their collaborative and communication skills, in a multinational and multidisciplinary environment. During the week, researchers from around Europe will work together with industrials on several intriguing problems in order to model and solve them. The term "industry" may include Engineering, Material Sciences, Big Data Technology, Biotechnologies, Optimization of industrial processes, Transport, Services, Medicine and other activities which have an economic or social value.

The first innsbruck ESGI will take place at Campus Technik, March 04-08, 2019. Please apply at <https://esgi-innsbruck.uibk.ac.at/registration/>. We can offer limited support for young scientists.

Organising committee

- Markus Haltmeier (University of Innsbruck, Austria)
- Alexander Ostermann (University of Innsbruck, Austria)
- Aviv Gibali (ORT Braude College, Israel)
- Refael Barkan (Holton Institute of Technology, Israel)

Scientific Board

- Poul G. Hjorth (Technical University of Denmark)
- Felix Kraemer (Technical University of Munich)
- Philipp Grohs (University of Vienna)
- Michael Günther (Bergische Universität Wuppertal)
- Koby Rubinstein (The Technion, Israel)

Department of Mathematics
